

XeivoraMed: The Trust Layer for the Next Billion

VERIFIED IDENTITY. LIQUID DATA. SEAMLESS CARE.

8s

THE INVISIBLE CRISIS

A clinical error occurs every 8 seconds due to missing patient data.

Fragmentation isn't just a technical problem—it's a life-and-death stakes reality for the next billion patients.

The "Graveyard" of PHRs

Friction

Patients aren't medical clerks.
Manual entry is the death of
adoption.

Trust

Doctors don't trust unverified
data. Without provenance, it's
clinically useless.

Utility

If it's not in the clinical
workflow, it doesn't exist in the
moment of care.

The Pivot: Data Liquidity

THE PAST

Passive Passport

- ✗ Patient-Managed
- ✗ Static Documents
- ✗ Low Provider Trust

THE FUTURE

Active Data Engine

- ✓ Provider-Led
- ✓ Automated Ingestion
- ✓ Verified Provenance

8s TO CRITICAL CONTEXT

"Faster than a manual chart search."

The 8-Second Miracle

Instant Life-Saving Context

In an emergency, every second counts. XeivoraMed delivers critical patient data before the doctor even reaches the bedside.

Seamless Provider Delivery

Context is pushed directly to the provider's screen, fitting perfectly into the high-stakes clinical workflow.

A BRIDGE TO DIGITAL SAFETY

The Physical Identity Anchor

A tangible asset for patient security. The XeivoraMed ID card ensures that critical data is accessible even when technology fails or the patient is unconscious.

SECURE QR POINTER

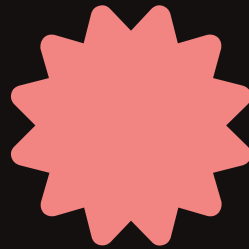

The card contains no sensitive data. It acts as a secure pointer that only authorized medical providers can unlock via our encrypted gateway.

EMERGENCY READY

Designed for first responders to scan and retrieve life-saving context (blood group, allergies, chronic conditions) in under 8 seconds.

IDENTITY LINKAGE

Linked directly to government-issued IDs and verified phone numbers, creating a robust, multi-layered identity framework.

XEIVORA-CERTIFIED™

The "Intel Inside" for Medical Data

Verification-as-a-Service

Data Provenance

Every data point is cryptographically linked to its source, establishing a root of trust that doctors can rely on.

Partner Ecosystem

Seamless integration with LIS and EMR systems to automate the certification of medical records at the source.

Liability Shield

Reducing clinical risk and legal exposure for providers by delivering verified, high-fidelity patient context.

The "Trojan Horse" Launch Sequence

01

GOV ANCHOR

- National Identity APIs (NIC/Passport).
- Establish the "Root of Trust" for identity.
- Regulatory alignment with PDPA/GDPR.

02

02

PRIVATE WEDGE

- Pilot with high-end private clinics.
- Automate data ingestion from certified labs.
- Prove the "8-Second Context" value.

03

NATIONAL SCALE

- Expand to public sector hospitals.
- Become the default data liquidity layer.
- Enable cross-border data portability.

The Beachhead: Sri Lanka

MOBILE-FIRST POPULATION

High smartphone penetration and digital literacy make it the perfect environment for a mobile-linked health identity.

REGULATORY CLARITY

The PDPA 2022 provides a clear, GDPR-aligned roadmap for data privacy and medical data handling.

SCALABLE BLUEPRINT

Success in Sri Lanka provides a high-fidelity model for expansion into India, SE Asia, and Africa.

150%+

MOBILE PENETRATION

PDPA 2022

GDPR-ALIGNED LAWS

92%

LITERACY RATE

50%

FASTER ONBOARDING

"Solving the \$100B problem of medical administrative waste."

The Business Case: Efficiency & Risk

Administrative ROI

Automated data ingestion eliminates manual entry, freeing up clinical staff and reducing operational overhead per patient visit.

Liability Mitigation

By relying on verified data provenance rather than verbal history, clinics significantly reduce the risk of malpractice and clinical error.

Increased Throughput

Faster intake directly translates to higher patient volume and increased revenue for private surgical and emergency units.

12-Month Execution Roadmap

Q1

IDENTITY ANCHOR

- Finalize Gov API access (NIC/Passport).
- Complete PDPA/GDPR legal framework.
- Launch Physical ID card prototype.

Q2

PRIVATE WEDGE

- Launch pilot with 3 top-tier private clinics.
- Integrate with 5 major diagnostic labs.
- First 1,000 verified patient profiles.

Q3

DATA LIQUIDITY

- Scale to 15+ clinic partners.
- Automated ingestion for 20+ data types.
- Launch "Xeivora-Certified" portal.

Q4

NATIONAL SCALE

- Begin public sector hospital integration.
- Prepare for Series A funding round.
- Target 50,000+ active patient users.

The Future of Global Health Identity

XeivoraMed is the "Intel Inside" for medical data in emerging markets. We are building the foundational infrastructure of trust for the next billion patients.

JOIN US IN BUILDING THE INFRASTRUCTURE OF TRUST.
